

My Web-app is supposed to give you some options to browse to 'feel better' – by browsing cool galleries, discovering new shows and book recommendations.

## 1.Mobile and desktop view

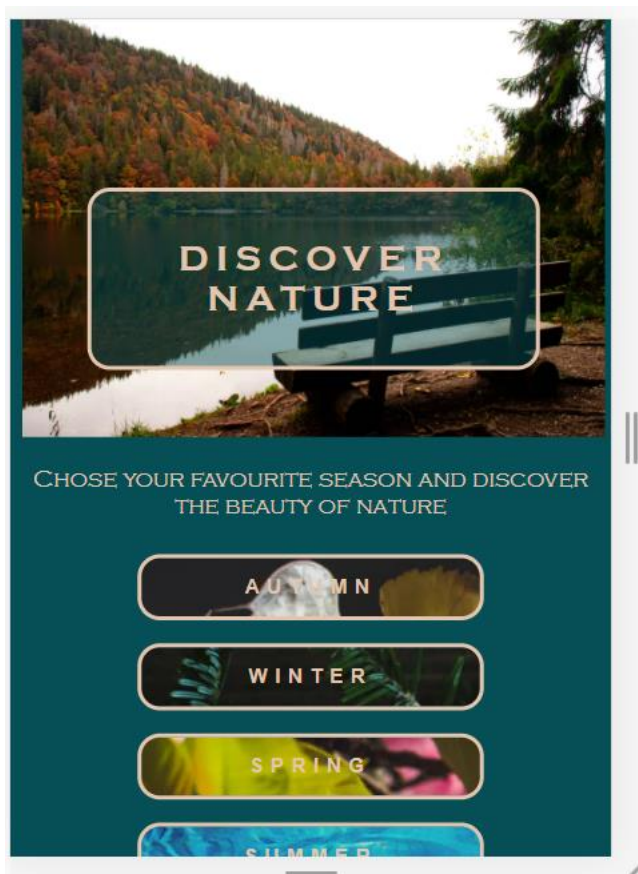

Desktop view (one title per page):

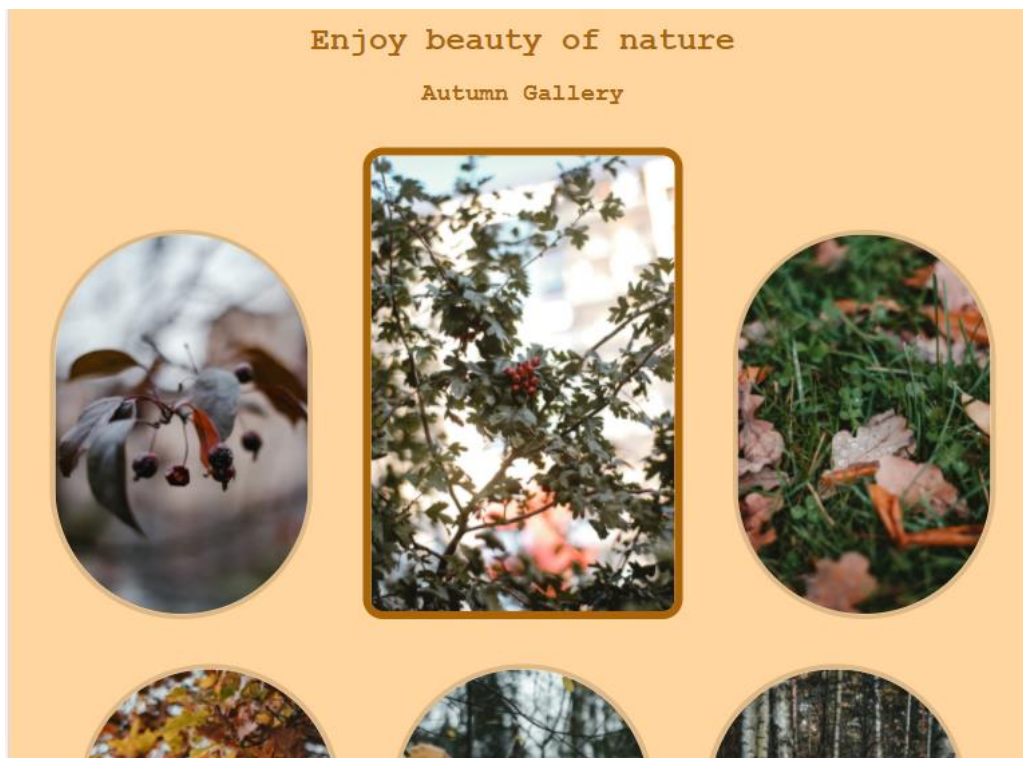

In mobile view 2 are shown at the height of the screen:

And when the content is toggled in the mobile view:

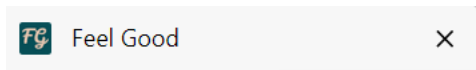

One of the galleries in the desktop and mobile views:

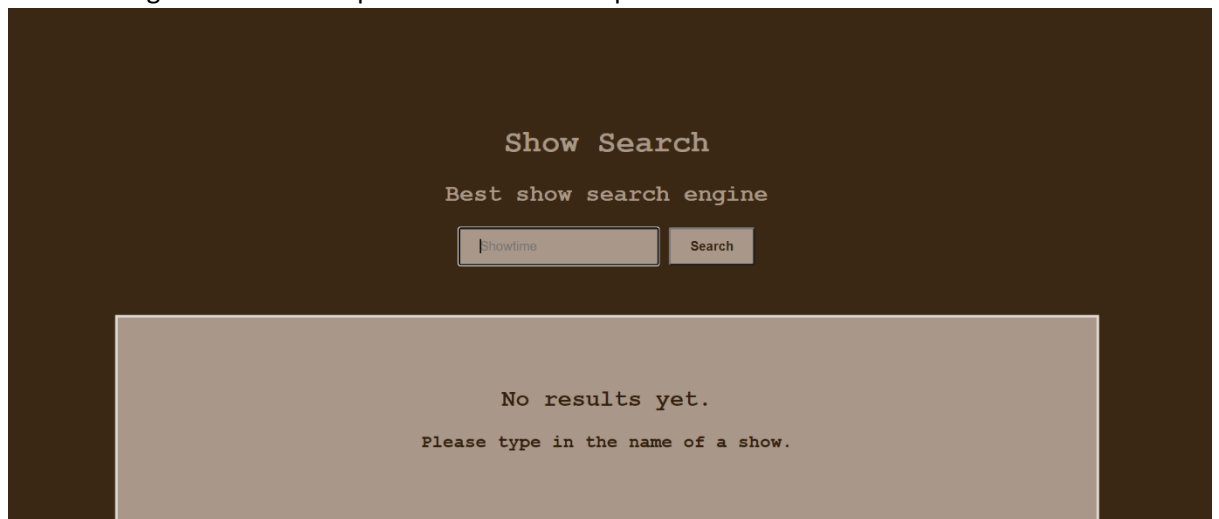

## 2. Extras:

- JS visibility toggle – the content only shows when you click on one of the titles
- Use of favicon

- A search engine for shows implemented via API requests from tvmaze.com

### 3. Validated code with no errors:

#### Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

#### Showing results for contents of text-input area

##### Checker Input

Show ☒ source ☐ outline ☐ image report [Options...](#)

Check by  ☐ css

```
<!DOCTYPE html>

<html lang="en">
<head>
  <meta charset="utf-8">

  <meta name="viewport" content="width=device-width, initial-scale=1">
  <title>Feel Good</title>
  <link rel="stylesheet" href="style.css">
</head>

<body>
<header>
<div class="box">
```

[Check](#)

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

[Message Filtering](#)

Document checking completed. No errors or warnings to show.
